INNOVATION IS KEY TO GROWTH

Important Information

This material is for informational purposes only and is subject to change without notice. All statements made regarding companies, securities or cryptocurrencies are strictly beliefs and points of view held by ARK and are not endorsements by ARK of any company, security or cryptocurrency, or recommendations by ARK to buy, sell or hold any security or cryptocurrency.

Certain of the statements contained in this material may be statements of future expectations and other forward-looking statements that are based on ARK's current views and assumptions and involve known and unknown risks and uncertainties that could cause actual results, performance or events to differ materially from those expressed or implied in such statements. ARK assumes no obligation to update any forward-looking information contained in this material. Certain information was obtained from sources that ARK believes to be reliable; however, ARK does not guarantee the accuracy or completeness of any information obtained from any third party. ARK and its clients as well as its related persons may (but do not necessarily) have financial interests in securities, issuers or cryptocurrencies that are discussed.

Digital assets, often referred to as cryptocurrencies, such as bitcoin and ether are relatively new investments, which have unique and substantial risks and which may be more volatile than other types of investments. Digital assets operate without central authority or banks and are not backed by any government. Even indirectly, digital assets may experience very high volatility. Digital assets are not legal tender. Federal, state or foreign governments could restrict the use and exchange of digital assets. Digital asset exchanges could stop operating or permanently shut down due to fraud, technical glitches, hackers or malware.

Digital assets, like bitcoin and ether, are subject to rapid price swings, including as a result of actions and statements by influencers and the media, changes in the supply of and demand for the digital asset, and other factors. There is no assurance that a digital asset will maintain its value over the long term.
ARK strongly encourages any investor considering an investment in any digital asset to consult with a financial professional before investing.
