

INNOVATION
IS KEY TO
GROWTH

October 8, 2020

ARK Investment Management Is Hiring:

Internet / Fintech Analyst

Who We Are:

ARK is a global investment manager focused solely on investing in disruptive innovation that is changing the way the world works. Majority Owner, Catherine D. Wood, founded ARK in 2014 on the belief that innovation is key to growth. Rooted in over 40 years of experience, ARK aims to identify large-scale investment opportunities in the public markets resulting from technological innovations centered around genome sequencing, robotics, artificial intelligence, energy storage, and blockchain technology.

ARK manages and sub advises long-only global public equity portfolios across a variety of investment vehicles, including a suite of exchange traded funds (ETFs), mutual funds, and separately managed accounts. Our investments are backed by an open research ecosystem designed to identify innovations with the potential for long-term growth.

As of November 30, 2020, the firm managed approximately \$43.6 billion assets.

ARK is committed to ensuring equal employment opportunities for all employees and strives to maintain an environment free of discrimination based on race, color, religion, gender, national origin, ancestry, age, disability, genetic information, military or veteran status, marital status, sexual orientation, gender identity, citizenship, or any other protected category or characteristics as defined by federal, state or local laws. If you want to learn more, visit our "[Philosophy](#)" page to understand how ARK differs from traditional investment firms. We also encourage you to meet the [ARK team](#) and follow us on twitter.

What You Will Do:

We expect you to perform high quality work to support our Internet and Fintech strategies. You will conduct original research on innovative financial technologies and next generation internet technologies, while providing coverage of companies in the fintech ecosystem. An understanding of the Asian market and related companies is a plus. Your work will directly inform our investment decisions, so your success is our success

Analyst Responsibilities:

- Support ARK portfolios by combining top-down thematic research and bottom-up fundamental analysis to identify investment opportunities
- Identify innovative technologies, model the growth rate and size of new markets, estimate unit economics, and assess competitive dynamics.
- Research and identify public companies that are the leaders, enablers, and beneficiaries of disruptive innovation.
- Form investment recommendations based on your research to share with the Portfolio Manager and guide trading decisions.
- Attend conferences, speak with the press, and meet with experts in a variety of fields to discuss the future of innovative technologies.

INNOVATION IS KEY TO GROWTH

- Author articles, whitepapers, and other content forms published under your name to bring your research to the world. See examples [here](#).
- Actively gather feedback on your work through Twitter and other online platforms.

Who You Are:

- You're a technological optimist. You believe in the power of technology to create a better future for humanity. You want to play a role in realizing and supporting that future.
- You're driven by innate curiosity and an endless desire to learn. You likely found ARK because your interests and ours converged. Since you follow the industry as closely as we do, you're already quite knowledgeable about one or more of the technologies we cover.
- You enjoy quantitative analysis—collecting data, transforming it, and using it as the backbone of your forecasts. You don't have to be a finance wizard, just a willingness to learn on the fly.
- You're a fabulous storyteller. You combine quantitative analysis, historical analogies, and cultural and user-centric considerations to form compelling narratives of how companies and technologies could evolve. Your writing would not look out of place on Wired or The Information.
- You're an independent thinker. You probably diverge from the mainstream, but you aren't merely contrarian. You are interested only in finding the truth. Your strong conviction is balanced by a healthy dose of humility.
- You're not just an analyst, you're a builder. You want to find ways to scale ARK as a company, guide its culture, and push us in new directions we've not yet considered.
- Bonus: you have decent programming chops. You can use scripting languages and analytics tools to scrape, analyze, and visualize data.
- If this description doesn't fit you but you have something unique to offer, please apply anyway.

How to Apply

The best way for us to get to know you is through examples of your work. This may be a blog, presentation, video, podcast, newsletter, or tweetstorm in the public domain. If you don't have an example of your work, we'd encourage you to create one.
