

## **ARK Investment Management Is Hiring: Genomics Analyst**

### **Who We Are:**

ARK is a global investment manager focused solely on investing in disruptive innovation that is changing the way the world works. Majority Owner, Catherine D. Wood, founded ARK in 2014 on the belief that innovation is key to growth. Rooted in over 40 years of experience, ARK aims to identify large-scale investment opportunities in the public markets resulting from technological innovations centered around genome sequencing, robotics, artificial intelligence, energy storage, and blockchain technology.

ARK manages and sub advises long-only global public equity portfolios across a variety of investment vehicles, including a suite of exchange traded funds (ETFs), mutual funds, and separately managed accounts. Our investments are backed by an open research ecosystem designed to identify innovations with the potential for long-term growth. As of September 30, 2019, the firm managed \$9.6 billion assets.

If you want to learn more, visit our "[Philosophy](#)" page to understand how ARK differs from traditional investment firms. We also encourage you to meet the [ARK team](#) and follow us on twitter.

ARK is committed to ensuring equal employment opportunities for all employees and strives to maintain an environment free of discrimination based on race, color, religion, gender, national origin, ancestry, age, disability, genetic information, military or veteran status, marital status, sexual orientation, gender identity, citizenship, or any other protected category or characteristics as defined by federal, state or local laws.

### **What You Will Do:**

We expect you to perform high quality work to support our Genomic Revolution strategy. Your work will directly inform our investment decisions, so your success is our success.

### **Analyst Responsibilities:**

- Perform and model original research, pertaining to companies, products, and market sectors
- Form investment recommendations to share with the portfolio manager and guide trading decisions

- Join conferences and meet with experts in a variety of fields to discuss the future of innovative technologies
- Author articles, whitepapers, and other content forms to bring your research to the world
- Engage with relevant communities through Twitter and other online platforms

**Who You Are:**

- An original thinker – you see how things will unfold ahead of the crowd.
- A lifetime learner – you consider learning to be the reward and nothing excites you more than mastering a new field.
- Comfortable with complexity – you absorb complex ideas quickly and easily separate the things that matter from the things that don't.
- You have a background in life sciences and a deep interest in how new biological technologies will impact the world.
- You view the world through both a technical and financial lens. You enjoy finding not just great technologies, but great investment opportunities.
- Your confidence is balanced by a sense of humility. You're more interested in figuring out what's right than being right.
- You enjoy working as part of a high-performance team. You want to contribute and build the team's culture.
- You are a crisp, engaging writer. You're savvy with social media and growing your reach.
- You are proficient in Microsoft Excel.

There is much more to share, so if you feel excited after reading the above, please email your resume and a brief cover letter to **Jay Chavis** ([jchavis@ark-invest.com](mailto:jchavis@ark-invest.com))
